Your Data Protection  
Starts Here.

PROSERVEIT 

# About Alarm Guardian

Powered by AI based cybersecurity technology from Microsoft and a team of highly trained and skilled cybersecurity experts, our Alarm Guardian security managed services helps businesses to detect cyberthreats early and mitigate the incidents (i.e. hacking, ransomware, data breaches) around the clock.

We help protect your business from hackers and data breaches by using the following philosophy: **Detect Early. Mitigate Properly.**

# What does Alarm Guardian help solve?

## Your Cybersecurity Concerns

Inability to identify, assess, and mitigate security risks in a timely fashion.

Lack of inhouse cybersecurity skills and shortage of internal cybersecurity staff.

Hard to identify the extend of any known breaches.

Lack of visibility into security incidents.

Fear of appearing on the local news due to a hack compromising your business.

Issues with meeting cybersecurity insurance requirements.

## Other Concerns Might Be

- What to do and where to start with cybersecurity.
- Information overload / indecision dilemma.
- Potential significant financial loss in the event of a breach.
- Loss of customers' trust and damage to brand reputation

# How can Alarm Guardian help secure your business?

## Alarm Guardian Solutions

Timely response to cyber attacks before damage is done.

Security team filled with seasoned cybersecurity professionals.
