

# Data Insights Foundation

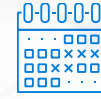

Connect 3 data sources to Power BI to automate reporting and visualize your data.

\$10,000+ USD

SMBs (maximum 300 employees)

2 Months

Start **unlocking the full potential of your business data**. Transform **data extraction, analysis, and reporting** by connecting up to 3 data sources to Power BI. Say goodbye to manual processes and hello to streamlined efficiency and smarter decision-making.

## Solve Your Top 3 Pain Points

### 1. Lengthy Data Extraction

Reduce the time needed to pull data from your information sources and retrieve critical information.

### 2. Complex Data Integration

Seamlessly integrate data from various sources across your business.

### 3. Error-Prone Manual Processing

Automate data processes to ensure reliable, consistent data every time.

## Business Benefits

### 1. Boosted Efficiency.

Automate data extraction and reporting processes to save time and resources.

### 2. Enhanced Data Accuracy.

Ensure your business decisions are based on precise and up-to-date information.

### 3. Superior Reporting Capabilities

Make informed decisions with impactful visualization of your business data.

### 4. Increased Forecast Precision

Boost data integration and reporting for accurate forecasting, improved planning, and optimized resources.
